

GLOBAL AFRICA GROUP

WORKSHOP

THEME: “Re-thinking North-South Cooperation and Knowledge Production for SDGs”

The WUN Global Africa Group is pursuing a programme of initiatives 2020-2022 to challenge, explicitly, the historically rooted inequities and existing orthodoxies in the global field of knowledge production and specifically, in research cooperation with Africa; and to develop alternative epistemologies and methodologies for constructive collaboration to advance inquiry on sustainable development. As a first event in its programme, the GAG will convene a virtual workshop for GAG steering group members and relevant thought leaders in the field of global - Africa research and knowledge production. The purpose of the workshop is to enable the group and partners to explore and establish a common framework for determining the nature, manifestations and implications of power imbalances in global North - Africa research cooperation and knowledge production around sustainable development; and for identifying approaches to redress them.

KEYNOTE SPEAKERS:

Prof. Elisio Macamo, University of Basel, Switzerland
